> The two chair coolies in the employ of Mr. Kelly who were charged some time ago with causing the death of another coolie in the same employ by assaulting him were again brought before Mr. Wiss at the Police Court on Saturday morning. It may be remembered that when the post mortem examination was made there existed considerable doubt as to whether the few contusions found on the man's body were of sufficiently serious nature to cause his death, and it was suggested that he had committed suicide by taking poison. Mr. Crow, the Government Analyst, stated that he had analysed the contents of the stomach of the deceased and found traces of meconic soid, one of the principal constituents of opium, but he was not prepared to say that it was present in sufficient quantity to cause death. The prisoners were discharged,

Colonel Bolo was found dead in his tent, the belief being that he had committed suicido out of mortification at having failed to make the march overland. A naval captain named Paredis then took command of the expedition, and shortly afterwards attacked the neighburing port of Oua, where most of the rebels were massed. The natives made a desperate defence, having dug two lines of trenches, and fortified the Protestant church, the Methodist schools, and several houses. The attack lasted all day, but by night time Ous was reduced to ruins, and the Kanaka tribe which had been defending it fled into the forests By the end the month order was re-established in the Caroline Islands, and the rebels had appealed, through friendly tribes, to the Governor to pardon them. The correspondent of the Debate adds, however, that Spain will probably encounter serious difficulties in offseting a permanent pacification of the country, as the rebels, though beaten in this instance, defended themselves so well that they may be encouraged to try con-

With a plentiful supply of patient workmen, Hongkong must evantually become, if not so already, the most important industrial centre of the Far East.
